

# STAGE MANAGEMENT PRODUCTS – RACK MOUNT KITS

## RACK MOUNT EARS AND SHELF KITS

Ace Backstage Co. Inc.'s Rack Mount Ears and Shelf Kits are made up of left and right rack mount ears and at shelf pan. The left/right rack ears are fabricated from 16 ga. steel and precision punched to matchup with various tape and CD decks and are finished with a black powder coat. The pan is also 16 ga. steel and is finished with the same heat set black powder coat finish as the rack mount ears. The pan lip may be assembled at the front or rear and in the up or down position for rigid support where needed. This kit provides a positive solid attachment of the deck to standard EIA rack rails. Both 2-space and 3-space kits are available. Assembly screws and self-locking nut-washers are included.

### #ABC-RS2U RACK MOUNT EARS AND SHELF KIT WITH 2 SPACE RACK EARS

**#ABC-RS2U Rack Kit Includes:**

A) 1 Shelf Pan

B) 1 Pair of 2 Space Rack Ears

**FINISH:** Electro-static applied oven-cured black semi-gloss powder coat

**FABRICATION:** Precision Die Cut

## MACKIE® RACK MOUNT EARS

Ace Backstage Co., Inc. has designed **NEW** Rack Mount Ears specifically for MACKIE® mixers. The rack mount ears are manufactured using 16 gauge steel. These rack mount ears will work on a variety of Mackie mixers, including the following models:

### RACK MOUNT EARS FOR MACKIE® MIXERS

#RE-1202 Rack Mount Ears for #1202-VLZ Mixer

#RE-1402 Rack Mount Ears for #1402-VLZ Mixer

#RE-1642 Rack Mount Ears for #1642-VLZ Mixer

## MACKIE® RACK MOUNT EARS INSTALL

Mackie® Rack Mount Ear Kits attach to the mixer using (4) existing chassis screws found at the corners of the mixer. The rack mount ears when properly installed permit the mixer to mount into standard EIA rack rails. Follow the steps listed below for complete installation.

- 1) Disconnect the A.C. power from the mixer
- 2) Remove screws at each corner that match the mounting holes provided in the rack mount ears

**CAUTION: DO NOT REMOVE ANY OTHER SCREWS**

- 3) Align the rack mount ears on each side of the mixer to match up with the screw holes
- 4) Attach the rack mount ears with the screws removed in Step 2

**CAUTION: DO NOT OVERTIGHTEN SCREWS**
